11/2/93

Dear Jonathan,

Thanks for the pictures, they are nice, and for the other enclosures in your 10/28.

I have no interest in dumping Posner but I <sup>am</sup> interested in what he says. I <sup>have</sup> ~~has~~ no interest in his Schein exchanges other than in the threat but I did enjoy what he wrote Jim about me that is other than he says in ~~his~~ his book. He could say other interesting things,

I do not know how to do anything about any NBC miniseries on him until we know <sup>tho</sup>. what it says. I've put what I have in the manuscript of a book that is being retyped and in general I prefer a definitive response, not possible in sound bites, to that kind of limitation in any medium.

Even the things I told you I'd like checked from the standard indicies are or limited usefulness without a proper context.

I've not had a single reporter ask me about what he said about me or about his book.

If Jim <sup>and</sup> wantd an opinion other than mine on the t book. Wrono has a duplicate of the rough draft and has read it.

In the event I run into trouble with my publisher, not impossible, the best answer I know to that pig is the fastest possible publication of that book and the maximim attention to it.

I have learned nothing further about his background than I told Jim and maybe you.

I assume the NBC miniseries will be the usual major-media whoring with out history.

They have no other use for him.

I've heard that the CBS special is going to use him, too.

One of my objections to all the theorizing with which I do not agree is that each one can be confronted with <sup>him</sup> them, as Posner confronted Wecht on CNN. Nonetheless Wecht did rather will on that.

I will be very interested in transcripts of all those shows at least for the historical record and some for possible additions to what I've written.

I'll say nothing about Sysop (what does that mean?) and I knew he was on Compuserv.

If you can use more of those envelopes I am sure we can find another box of them. Maybe also some plain ones not quite that large. They'd have to be looked for in our basement and they would be in sealed cartons.

Thanks and best wishes,

*Hard*
